

BC327, BC328

Small Signal Transistors (PNP)

Dimensions in inches and (millimeters)

FEATURES

- ◆ PNP Silicon Epitaxial Planar Transistors for switching and amplifier applications. Especially suitable for AF-driver stages and low-power output stages.
- ◆ These types are also available subdivided into three groups -16, -25, and -40, according to their DC current gain. As complementary types, the NPN transistors BC337 and BC338 are recommended.
- ◆ On special request, these transistors are also manufactured in the pin configuration TO-18.
