

Advance Information

Sensitive Gate Triacs

Silicon Bidirectional Thyristors

... designed primarily for full-wave ac control applications, such as light dimmers, motor controls, heating controls and power supplies; or wherever full-wave silicon gate controlled solid-state devices are needed. Triac type thyristors switch from a blocking to a conducting state for either polarity of applied anode voltage with positive or negative gate triggering.

- Sensitive Gate Triggering (A and B versions) Uniquely Compatible for Direct Coupling to TTL, HTL, CMOS and Operational Amplifier Integrated Circuit Logic Functions
- Gate Triggering 4 Mode — MAC6071A,B, MAC6073A,B, MAC6075A,B
- Blocking Voltages to 600 Volts
- All Diffused and Glass Passivated Junctions for Greater Parameter Uniformity and Stability
- Small, Rugged, Thermopad Construction for Low Thermal Resistance, High Heat Dissipation and Durability

*Motorola preferred devices

TRIACs
4 AMPERES RMS
200 thru 600 VOLTS

MAXIMUM RATINGS (T_J = 25°C unless otherwise noted)

Rating	Symbol	Value	Unit
Peak Repetitive Off-State Voltage ⁽¹⁾ (Gate Open, T _J = 25 to 110°C)	V _{DRM}	200 400 600	Volts
On-State Current RMS (T _C = 85°C)	I _{T(RMS)}	4	Amps
Peak Surge Current (One Full cycle, 60 Hz, T _J = -40 to +110°C)	I _{TSM}	30	Amps
Circuit Fusing Considerations (t = 8.3 ms)	I ² t	3.7	A ² s
Peak Gate Power	P _{GM}	10	Watts
Average Gate Power	P _{G(AV)}	0.5	Watt
Peak Gate Voltage	V _{GM}	5	Volts
Operating Junction Temperature Range	T _J	-40 to +110	°C
Storage Temperature Range	T _{stg}	-40 to +150	°C
Mounting Torque (6-32 Screw) ⁽²⁾	—	8	in. lb.

1. V_{DRM} for all types can be applied on a continuous basis. Blocking voltages shall not be tested with a constant current source such that the voltage ratings of the devices are exceeded.

2. Torque rating applies with use of compression washer (B52200F006). Mounting torque in excess of 6 in. lb. does not appreciably lower case-to-sink thermal resistance. Main terminal 2 and heatsink contact pad are common.

For soldering purposes (either terminal connection or device mounting), soldering temperatures shall not exceed +200°C, for 10 seconds. Consult factory for lead bending options.

This document contains information on a new product. Specifications and information herein are subject to change without notice.

Preferred devices are Motorola recommended choices for future use and best overall value.
